Notes to Interim Financial Statements

For the three and six-month periods ended February 28, 2026 and 2025 (unaudited)

(in Canadian dollars)

1. NATURE OF OPERATIONS

Vision Lithium Inc. (the “Company”) is an exploration company with activities in Canada.

2. GOING CONCERN ASSUMPTION, GENERAL INFORMATION AND STATEMENT OF COMPLIANCE WITH IFRS ACCOUNTING STANDARDS

The interim financial statements have been prepared on the basis of the going concern assumption, meaning the Company will be able to realize its assets and discharge its liabilities in the normal course of operations.

Given that the Company has not yet determined whether its mineral properties contain mineral deposits that are economically recoverable, the Company has not yet generated income nor cash flows from its operations. As at February 28, 2026 the Company has negative working capital of \$805,953 (\$259,992 as of August 31, 2025) and has an accumulated deficit of \$49,860,141 (\$49,367,702 as at August 31, 2025). These material uncertainties cast significant doubt regarding the Company’s ability to continue as a going concern.

The Company’s ability to continue as a going concern is dependent upon its ability to raise additional financing to further explore its mineral properties and continued support of suppliers and creditors. Even if the Company has been successful in the past in doing so, there is no assurance that it will manage to obtain additional financing in the future.

The carrying amounts of assets, liabilities, revenues and expenses presented in the financial statements and the classification used in the statement of financial position have not been adjusted as would be required if the going concern assumption was not appropriate.

The interim financial statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (hereafter “IFRS Accounting Standards”).

Vision Lithium Inc. is incorporated under the *Canada Business Corporations Act*. The address of the Company's registered office and its principal place of business is 1019 boulevard des Pins, Val-d'Or, Quebec, Canada. Vision Lithium Inc.’s shares are listed on the TSX Venture Exchange under the symbol “VLI”.

3. STANDARDS AND NEW OR REVISED INTERPRETATIONS

3.1 Standards, amendments and interpretations to existing standards that are not yet effective and have not been adopted early by the Company

At the date of authorization of these interim financial statements, certain new standards, amendments and interpretations to existing standards have been published but are not yet effective, and have not been adopted early by the Company.

Management anticipates that all of the pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of the pronouncement. Information on new standards, amendments and interpretations that are expected to be relevant to the Company's interim financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have an impact on the Company's financial statements.

Notes to Interim Financial Statements

(in Canadian dollars)

3.1 Standards, amendments and interpretations to existing standards that are not yet effective and have not been adopted early by the Company (continued)

IFRS 18 Presentation and Disclosure in Interim Financial Statements

In April 2024, the IASB issued IFRS 18, which replaces IAS 1 Presentation of Interim Financial Statements. IFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Furthermore, entities are required to classify all income and expenses within the statement of profit or loss into one of five categories: operating, investing, financing, income taxes and discontinued operations.

It also requires disclosure of newly defined management-defined performance measures in a single note, subtotals of income and expenses, and includes new requirements for aggregation and disaggregation of financial information based on the identified "roles" of the primary interim financial statements (PFS) and the notes.

In addition, narrow-scope amendments have been made to IAS 7 Statement of Cash Flows, which include changing the starting point for determining cash flows from operations under the indirect method, from "profit or loss" to "operating profit or loss" and removing the optionality around classification of cash flows from dividends and interest.

IFRS 18 and the amendments to the other standards are effective for reporting periods beginning on or after January 1, 2027, with earlier application permitted. IFRS 18 will apply retrospectively with specific transition provisions.

The Company is currently working to identify all impacts the amendments will have on the primary interim financial statements and notes to the financial statements.

4. JUDGMENTS, ESTIMATES AND ASSUMPTIONS

When preparing the interim financial statements, management makes a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses.

4.1 Significant management judgment

The following are significant management judgments in applying the accounting policies of the Company that have the most significant effect on the interim financial statements.

Recognition of deferred income tax assets and measurement of income tax expense

Management continually evaluates the likelihood that its deferred tax assets could be realized. This requires management to assess whether it is probable that sufficient taxable income will exist in the future to utilize these losses within the carry-forward period. By its nature, this assessment requires significant judgment. To date, management has not recognized any deferred tax assets in excess of existing taxable temporary differences expected to reverse within the carry-forward period.

Going concern

The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay for its ongoing operating expenditures, meet its liabilities for the ensuing year, and to fund planned and contractual exploration programs, involves significant judgment based on historical experience and other factors including expectation of future events that are believed to be reasonable under the circumstances (see Note 2 for more information).

Vision Lithium Inc.

Notes to Interim Financial Statements

4.2 Estimation uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

Lease obligations

Accounting for lease obligations involves judgment and requires the establishment of a number of estimates and assumptions. Judgment is used to determine whether there is reasonable certainty that an option to extend or terminate the rental agreement will be exercised. In addition, management has made estimates to determine the term of the leases and the appropriate interest rate to value the lease obligation (see Note 5).

Impairment of exploration and evaluation assets

Determining if there are any facts and circumstances indicating impairment loss or reversal of impairment losses is a subjective process involving judgment and a number of estimates and assumptions in many cases.

When an indication of impairment loss or a reversal of an impairment loss exists, the recoverable amount of the individual asset or cash-generating unit must be estimated.

In assessing impairment, the Company must make some estimates and assumptions regarding future circumstances, in particular, whether an economically viable extraction operation can be established, the probability that the expenses will be recovered from either future exploitation or sale when the activities have not reached a stage that permits a reasonable assessment of the existence of reserves, the Company's capacity to obtain financial resources necessary to complete the evaluation and development and to renew permits. Estimates and assumptions may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in profit or loss in the period when the new information becomes available.

See Note 6 for the exploration and evaluation assets impairment analysis.

The total impairment loss of the exploration and evaluation assets recognized in profit or loss amounts to \$14,004 for the six-month period ended February 28, 2026 (\$3,045,003 for the year ended August 31, 2025). No reversal of impairment losses has been recognized for the reporting periods.

Other properties have not been tested for impairment as the Company has the ability to retain these properties as it plans on having sufficient financial resources to meet its short-term obligations. In general, the rights to prospect these properties will not expire in the near future or are expected to be renewed, work has been completed on these properties over the past three years and / or results promising results were obtained.

Share-based payments

The estimation of share-based payment costs requires the selection of an appropriate valuation model and consideration as to the inputs necessary for the valuation model chosen. The Company has made estimates as to the volatility of its own shares, the probable life of share options and warrants granted and the time of exercise of those share options and warrants, if applicable. The model used by the Company is the Black-Scholes valuation model (see Notes 9.2 and 10.2).

Vision Lithium Inc.

Notes to Interim Financial Statements

For the three and six-month periods ended February 28, 2026 and 2025 (unaudited)

(in Canadian dollars)

4.2 Estimation uncertainty (continued)

Tax credits receivable

The calculation of the Company's refundable tax credit on qualified exploration expenditure incurred and refundable tax credit involves a degree of estimation and judgment in respect of certain items whose tax treatment cannot be finally determined until notice of assessments and payments have been issued from the relevant taxation authority and a payment has been received. Difference arising between the actual results following final resolution of some of these items and the assumptions made could necessitate adjustments to the refundable tax credit, exploration and evaluation assets, and income tax expense in future periods.

All write-off charges are presented in profit or loss under Write-off of Exploration and evaluation assets whereas all impairment charges are presented in net income under the heading Devaluation exploration and evaluation assets.

During the year ended August 31, 2025, the Company has devaluated and written off the mining rights and exploration expenses capitalized on the Epsilon and Dôme Lemieux properties for the following reasons: abandonment of claims and/or no exploration work planned (During the year ended August 31, 2025, the Company has devaluated and written off the mining rights and exploration expenses capitalized on the Epsilon, Dôme Lemieux and Decelles properties were written off, for the same reasons).

Sirmac Lithium

The Company owns 100% of the Sirmac Lithium property which comprises 155 mineral claims covering a total area of approximately 7,670 hectares located approximately 180 km northwest of Chibougamau, in the province of Quebec.

Vision Lithium Inc.

6. EXPLORATION AND EVALUATION ASSETS (continued)

Red Brook

On June 12, 2020, the Company acquired the Red Brook property, 100% owned, which is located approximately 60 km West of the mining center of Bathurst, in Northern New Brunswick. The Red Brook property consists of 240 claims covering an area of 5,816 hectares. This property is subject to 2% NSR royalties on all mineral production. The Company can buy back up to 50% of each of the NSR interests for \$1,000,000.

Cadillac Lithium

As at August 31, 2024, the Company had received a total of \$1,025,000 and 10,000,000 common shares of Olympio Metals ("Olympio"), with a fair value of \$1,375,000. These amounts were recorded as a reduction in the cost of the asset. An amendment to this agreement was signed on December 11, 2023. With this amendment, Olympio acquires 1% of the right of the Cadillac Lithium property upon the signature and the remaining 99% of the right upon execution of the option. Olympio had until October 31, 2024, to execute the option, which was not done. The Company retains a right of redemption of \$1 for the 1% right in the event that the option is not executed.

On August 1, 2023, the Company signed an option agreement with Olympio which allows it to acquire a 100% undivided interest in the Cadillac Lithium property, over a period of one year from the signature. Olympio agrees to pay upon signing an amount of \$500,000 in cash, to issue 10,000,000 common shares within 5 business days of receipt of approvals and to pay an additional amount of \$500,000 in cash within 30 days from the date of approval. Within one year, Olympio agrees to pay \$1,000,000 in cash to the Company and to spend \$500,000 on the property in exploration costs.

On August 30, 2021, the Company acquired by staking the 100%, owned Cadillac property, which is located approximately 25 km south of Rivière Héva along Chemin du Rapide-Deux.

On December 2, 2021, the Company acquired a 100% interest in the Cadillac lithium property, including a total of 215 contiguous mining claims in the province of Quebec, from four separate groups of sellers. The claims acquired from the sellers cover 12,331 hectares. The Company may repurchase up to 50% of certain of the NSR royalties at an individual price of \$500,000.

The Company has acquired by staking 6 claims in 2024 and 119 claims in 2022 for a total of 340 claims on the Cadillac property, covering an area of 19,094 hectares.

Dôme Lemieux

This 100% owned property is located near the town of Ste-Anne-des-Monts in the province of Quebec and comprises 218 claims covering 12,693 hectares. The property is explored for porphyry-type copper-zinc-silver-gold deposits. The property has been devaluated during fiscal year 2025 as no exploration work is planned.

Epsilon

This 100% owned property is located in the Otish Mountains region of Quebec. The Epsilon Uranium-Gold property consists of 21 claims covering 2,006 hectares. This property is subject to two NSR royalties of 2% on all mineral production. The Company can buy back up to 50% of each of the NSR interests for \$1,000,000 each. The property was written off during the year 2025.

11. FAIR VALUE MEASUREMENT

11.1 Financial instruments measured at fair value

Financial assets and liabilities measured at fair value in the statement of financial position are grouped into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly ; and
- Level 3: unobservable inputs for the assets or liabilities.

	Three-month period ended		Six-month period ended	
	February 28, 2026	February 28, 2025	February 28, 2026	February 28, 2025
	\$	\$	\$	\$
Finance income	381	739	765	1,794

Finance cost may be analyzed as follows for the reporting periods presented:

	Three-month period ended		Six-month period ended	
	February 28, 2026	February 28, 2025	February 28, 2026	February 28, 2025
	\$	\$	\$	\$
Interests on lease obligations	268	541	606	1,148

13. LOSS PER SHARE

In calculating the diluted loss per share, dilutive potential common shares such as options and warrants have not been included as they would have the effect of decreasing the loss per share. Decreasing the loss per share would be antidilutive. Details of share options and warrants issued that could potentially dilute earnings per share in the future are given in Notes 9.2 and 10.2.

Both the basic and diluted loss per share have been calculated using the net loss as the numerator, i.e. no adjustment to the net loss was necessary for the three-month periods ended February 28, 2026 and 2025.

	Three-month period ended		Six-month period ended	
	February 28, 2026	February 28, 2025	February 28, 2026	February 28, 2025

16. CAPITAL MANAGEMENT POLICIES AND PROCEDURES

The Company's capital management objectives are to ensure the Company's ability to continue as a going concern, to increase the value of the assets of the business, and to provide an adequate return to shareholders of the Company.

These objectives will be achieved by identifying the right exploration projects, adding value to these projects and ultimately taking them through to production or sale and cash flow, either with partners or by the Company's own means.

The Company monitors capital on the basis of the carrying amount of equity.

The Company is not exposed to any externally imposed capital requirements except when the Company issues flow-through shares for which an amount should be used for exploration work, details provided in Notes 9 and 18.

The Company finances its exploration and evaluation activities principally by raising additional capital either through private placements or public offerings.

When financing conditions are not optimal, the Company may enter into option agreements or other solutions to continue its exploration and evaluation activities or may slow its activities until conditions improve.

17. FINANCIAL INSTRUMENT RISKS

The Company is exposed to various risks in relation to financial instruments. The main types of risks are market risk, credit risk and liquidity risk.

The Company focuses on actively securing short to medium-term cash flows by minimizing the exposure to financial markets. The Company does not actively engage in the trading of financial assets for speculative purposes.

The most significant financial risks to which the Company is exposed are described below.

Vision Lithium Inc.

Notes to Interim Financial Statements

For the three and six-month periods ended February 28, 2026 and 2025 (unaudited)

(in Canadian dollars)

17.1 Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The company is exposed to other price risk.

Sensitivity to other price risk

The Company is exposed to fluctuations in the market price of its marketable securities in quoted mining exploration companies. The maximum risk to which securities are exposed is equal to their fair value.

If the published price of these securities had varied by +/- 146% as at February 28, 2026, comprehensive income and shareholders' equity would have varied by \$nil (\$1,220,987 as at August 31, 2025).

17.2 Credit risk

Credit risk is the risk that another party to a financial instrument will cause a financial loss for the Company by failing to discharge an obligation.

The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets at the reporting date, as summarized below:

	February 28, 2026	August 31, 2025
	\$	\$
Cash	863,881	30,549
Guaranteed investment certificates	78,209	77,443
	942,090	107,992

The Company's management considers that all the above financial assets that are not impaired or past due for each of the reporting dates under review are of good credit quality. The Company's management considers that the credit risk is not

17.3 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Liquidity risk management serves to maintain a sufficient amount of cash and to ensure that the Company has financing sources such as private and public investments for a sufficient amount.

During the six-month period ended February 28, 2026, the Company has financed its exploration and evaluation programs, its working capital requirements.

17.3 Liquidity risk (continued)

The following table presents contractual maturities (including interest payments where applicable) of the Company's liabilities:

	February 28, 2026	August 31, 2025
	\$	\$
Less than 6 months:		
Trade and other payables	1,337,906	770,797

The Company considers the cash flows that it expects to derive from financial assets in its assessment and management of liquidity risk, in particular, cash, guaranteed investment certificates and sales taxes receivable.

18. CONTINGENCIES AND COMMITMENTS

The Company is partially financed through the issuance of flow-through shares and, under the tax rules relating to this type of financing, the Company is committed to carrying out exploration and evaluation expenses.

These tax rules also set deadlines for carrying out exploration work no later than the first of the following dates:

- Two years following flow-through placements;
- One year after the Company waived tax deductions relating to exploration work.

However, there is no guarantee that these exploration expenses will qualify as exploration expenses in Canada, even if the Company is committed to taking all the necessary measures in this regard. Refusal of certain expenses by the tax authorities could have a negative tax impact for investors.

During six-month period ended February 28, 2026, the Company received an amount of \$280,000 from flow-through placements (\$500,000 as at August 31, 2025) for which the Company renounced to the tax deductions, for the benefit of investors. Management is required to fulfill its commitments within the stipulated period of one year from the renunciation date.

As at February 28, 2026 the balance of the unspent funding related to flow-through financing amount totals \$256,732 (\$323,474 as at August 31, 2025).
